

Dear Sirs,

With the Prime Minister confirming that the Government is acting as if on a wartime footing, our priority is to keep construction sites operational for as long as possible throughout the current crisis. During this unprecedented period GeoShield are taking a responsible and proactive stance.

All our Verification Officers have been suitably trained and are updated on a daily basis regarding the Government's current strategy. This allows us to work responsibly with yourselves whilst creating a safe working environment.

Our Verification Officers follow strict protocol issued by our Health and Safety Advisors and the Government's 'Guidance for Employers and Businesses on Coronavirus (COVID-19)'.

- The size and geographic spacing of the GeoShield team allows cover and support throughout the UK. We will ensure your contract schedule is maintained.
- Verification Officers work in isolation as part of their daily routine, this is not new to us.
- PVC gloved hands are part of site PPE, hands are repeatedly washed and hand sanitisers and alcohol wipes have been provided and are in constant use.
- Vehicles and equipment hygienically cleaned throughout the day, before and after each visit.
- GeoShield's focus is to restrict physical contact to zero. Social Distancing in accordance with Government guidelines is strictly adhered to.

Please do not hesitate to call, so we can assist in this difficult period
